

the most trusted name in cables

TROPODURManufactured by
CABLE CORPORATION OF INDIA LTD.**TRINITY**

the people who deliver it faster!

Intensive scientific testing is the integral part of CCI's modern production methods. Cables are checked for stability, insulation resistance, ageing characteristics, flame retardation and water absorption of the special PVC compound used. A detailed record of every production stage is kept for every cable length despatched—an important reason why discriminating engineers specify TROPODUR!

For your requirements, contact any Tropodur dealer or Distributors:

Facsimile of the 20-paisa special postage stamp to be issued on August 15 in honour of Sri Aurobindo on the occasion of his birth centenary. The stamp printed in golden yellow and oriental blue, depicts the symbol of Sri Aurobindo. The sun around the symbol represents the super-mind.

Supreme Court's ruling today on amendments

NEW DELHI, August 9: The Constitution Bench of the Supreme Court will decide tomorrow on reconsideration of a 1967 ruling that Parliament cannot change the fundamental rights. Swami Keshavananda Bharathi of the Edaneer Math in Kerala has the court review of the 24th, 25th and 29th constitutional amendments, saying the first two create "a new constitution" different from the one adopted in 1950.

His contention was brought by the jurist, Mr. M. C. Chagla, before a divisional bench of the court this morning. The attorney-general, Mr. Nien De, said the government would not oppose a reconsideration of the 1967 ruling in the Golaknath case.

Mr. Chagla said his client only wanted the constitutional amendments to be struck down in the light of the 1967 judgment.

The Chief Justice, Mr. S. M. Sikri, ordered the application to be put up to the Constitution bench tomorrow.

Mr. Chagla argued that all the three amendments were invalid because of the court's 1967 ruling. And, Mr. De agreed that the high courts, bound by that ruling, may be held if the amendments were challenged before them.

The Chief Justice jocularly remarked that there appeared to be "collusion" between the litigant and the government, and said he did not agree with Mr. De's reading of the Golaknath ruling.—P.T.I.

HAL to build new copters this year

BANGALORE, August 9: The production of a new series of helicopters would commence during the current year in the new helicopter factory now under construction at the HAL here.

Air Marshal O. P. Mehra, HAL chairman, said future plans included the setting up of facilities for the design and development of an indigenous helicopter in collaboration with the "Sniar" of France. A detailed project report on this was now awaiting government approval, he said.

The HAL had also submitted to the government proposals to develop further the Gnat which, the Air Marshal said, had more than proved its worth during the Indo-Pakistani war. He felt the Gnat would serve the country well for some more time to come. "Our aim would be to improve its performance and utility," the Air Marshal said.

The HAL would also go ahead with the development of the MK 11 fighter which, the Air Marshal said, had considerable development potential.

Among the future tasks of the HAL, he said, the most challenging would be that of designing, developing and manufacturing an advanced technology weapon system capable of meeting the requirements of the IAF in the 1980s. Various problems involved in this task were being considered by the HAL in consultation with the government and its various agencies, he said.—P.T.I.

New MiGs next year

BANGALORE, August 9: Deliveries of a new MiG version from Hindustan Aeronautics Ltd. will commence in 1973/74.

The HAL directors' annual report says that the manufacturing programme of the new version is going apace at the MiG divisions of the HAL.

It also reveals that a new prototype of an agricultural aircraft is expected to fly next month. The first prototype designed and built by HAL engineers made its successful maiden flight on March 30.

Concurrently, work is in progress on the manufacture of the first batch of pre-production aircraft, the report adds.—P.T.I.

Railings along highway bridge okayed

Plans to construct pre-cast railings on both sides of the bridge at Bandra on the Western Express Highway have been approved by the government, Mr. G. S. Sarnaik, minister of state for buildings and communications, told the legislative assembly on Wednesday.

Replying to a short-notice question by Mrs. Mrinal Gore (SP), the minister said the railing construction was estimated to cost Rs. 80,620. The work would begin as soon as funds were available, he said.

The government was negotiating with the Bombay municipal corporation on the issue sharing the cost.

The minister said the BEST had requested the government to erect walls on both the sides of the approach road to the bridge.

Mr. K. P. Patil, minister of state for electricity, told Mr. R. A. Patil (Cong.) that the government had undertaken a survey to explore the possibilities of setting up a thermal power station in Unred (Nagpur district) and in Chanda-Ballarpur (Chanda district). The government wished to complete the work in the next five to ten years, he added.

Probe into allotment of plot ruled out

The three plots on the Loyds Reclamation in south Bombay had been allotted to Bombay University, the Bombay Hockey Association and the Bombay Cricket Association on lease, the sports minister, Mr. A. N. Mamjoshi, said in the Maharashtra Legislative council in Bombay on Wednesday.

The minister told Dr. V. R. Pandit (JS) that the Marine Drive Welfare Association, in its letter dated May 12, 1972, had complained about the allotment of plot to the Bombay Cricket Association.

The minister explained that the government had given the plot to the Bombay Cricket Association on lease in 1966. There was no need for any inquiry into the matter.

DISPOSAL OF AUTOMATIC LATHE

The following imported Automatic Lathe is available for immediate disposal:

PJ-400 Automatic Chucking Machine, capable of receiving a 25 or 40 HP Main Motor supplied with one 25 HP one speed Motor 1500 rpm, tropicalised electrical equipment upto 40°C and suitable for operation with 400/440 Volts 50 Cycles, 3 phase supply with reversing starter (machine Calibrated in metric units).

Intending buyers may please obtain detailed specifications etc. of the machine from the Commercial Officer, Praga Tools Ltd., Kavadiaguda Road, Secunderabad-3.

The last date for receipt of the offers is 12.9.1972.
