RECOMMENDATIONS

NEW DELHI, Aug. 23. The Experts Committee appointed by the President of the Constituent Assembly to make recommendations as to how the Assembly should perform the dual functions of constitution-making and legislative work has, it is understood, concluded its works.

In this case, the Committee suggests there should be a separate President elected to preside over these sessions as Dr. Rajendra Prasad is a member of the Sovernment. It has been pointed out by the Committee that members of the Covernment, who are not members of the Constituent Assembly, could automatically attend such sessions even under the Government of India Act 1935, which is, in fact heins adapted. is, in fact being adapted.

If, however, no full legislative programme is contemplated, the Committee has suggested that an hour or two might be set apart, whenever necessary, during the regular session of the Assembly for constitution-making, and during this time, members could ask questions or wherevise bring to the fore matters of

PROTECTION FOR **ANGLO-INDIANS**

NEW DELHI, Aug. 23.
The Advisory Committee of the Constituent Assembly met to-day and is understood to have approved the recommendation of the Minorities Sub-Committee relating to recruitment of Anglo-Indians.

The Minorities Sub-Committee had recommended that recognising the peculiar position of the Anglo-Indian community and the danger of economic collapse overtaking the community if a sudden change was made in the policy of recruitment of Anglo-Indians to the or recruitment of Anglo-Indians to the Railways, Posts and Telegraphs and other Services, in the next ten years, there should be some kind of protection for the Anglo-Indians, after which period they must rank with other communities in the matter of recruitment to these Services.

The following formula has been accepted: The present reservation of posts in the Railways, Posts and Telegraphs should continue for the first two years of the passing of the new Constitution, after which it should be reduced by ten per cent, and similarly reduced by a further ten per cent every other year for eight more years, after which there should be no reservation of posts. Throughout this period, In regard to the status of Indian States representatives, the Committee is understood to have realised the position that representatives of acceding States could by right, participate in legislative work ating to the three subjects of accession. The Committee has further expected the view that although these legislations over and above those reserved for them.

how and under what provisions of law was the Frontier Province Ministry which still commands a majority in the Legislature, dismissed. Presumably Legislature, dismissed. Presumably, the Ministry has been dismissed by the Governor under instructions from the Governor-General. It may be mentioned that under the Adaptation Orders passed by the Governor-General, Section 93 has been omitted for both the Dominions. While Section 51 Sub-section 5 has been omitted for the Indian Dominion, it has been adapted for Poliston in a modified form which for Pakistan in a modified form, which functions under this Section, with respect to choosing and summoning and dismissal of Ministers, the Governor shall be under the general control of and comply with such particular directions if any as may from time to time be given to him by the Governor-General". It is presumed that the Frontier Ministry was dismissed under the powers that may be alleged to have been vested in the Pakistan Governor-General by this new Sub-section.

pointed out that dishissal of the mins-try under Section 51 Sub-section 5 could not be justified either under the terms of the Indian Independence Act or any conventions and rules normally applicable to Governments responsible to the Legislature. Section 8 Sub-section (2-c) of Indian Independence Act puls an end to the discretionary powers enjoyed by the Governors and the Governor-General. Section 51 Sub-section 5 could not, therefore, be construed as empowering the Governor-General to pass an order nullifying the provisions of Section 8 Sub-section (2-c) of Inde-pendence Act. Section 51 Sub-section 5 has been obviously utilised by the Paki-stan Dominion to reintroduce provisions which have been in terms repealed by the Indian Independence Act. Thus, the Pakistan Government starts with a step

section 5 is intra vires, It is pointed out by the constitutional expert, that the Section will have to be given effect to in accordance with the accepted principles of democracy applicable to institution of Responsible Governments. Prof. Jennings points out that no Ministry has been dismissed in England since 1783. The normal procedure of asking the Ministry to dissolve the Legislature has not been followed and the announcement of the Frontier Governor says nothing beyond the fact of dismissal of the Ministry.

In the early years of Responsible Governments in the Dominions, such light dismissal was claimed by the Governor-

vailed.

It may be recalled that when Sir George Cunningham was formerly Governor of the North-West Frontier Province he allowed the League Ministry with a minority following in the Legislature to function while a large number of members of the Congress Party were in jail. It is to be hoped that the Frontier Governor will follow the democratic traditions and order fresh elections or convene a meeting of the Frontier Assembly immediately as to give it a chance to vote confidence at least in the new Ministry.

When the U.N. Security Council took up the Indonesian case on Friday, M. Gromyko, the Russian delegate, stoutly opposed an American move to get a special committee of three to assist in the settlement of the dispute.

Dr. Pillai declared: "The Charter gives

Dr. Pillai said that India would support the Australian resolution as amended by Poland, as it considered it essential that the Security Council should appoint its own commission to investigate the Indonesian question. The Council must also insist on groups of troops returning to their original posi-

Dr. Pillai said: "Animated by the democratic slogans of Europe, Asiatic countries took part in the struggles for democracy. European countries may have viewed these slogans ethically but Asiatic nations, being more naive, believed in them and hoped for freedom. They have been disillusioned.

This is not surprising in the view of the observers, as Poland stands for sired, but they must be Security Council arbitration by the Security Council and ending the colonial system in Indonesia The Chinese resolution pays lip-service for a settlement in Dutch hands.

The Indoensian delegation headed by

The Indoensian delegation headed by Dr. Sutan Sharir are firmly clinging to the Security Council as the sheet-anchor of their hopes. The delegation yesterday visited Washington and interviewed State Department officials, but there has since been no change in its attitude. One Indonesian source said they recognised they might have to pay heavily in the immediate future for inheavily in the immediate future, for in-sistence on action by the Security Council. The source added: "However, if we yield now, it would be ultimately disastrous to ourselves as well as to

all subject peoples."

The United States' policy in this respect is being severely criticised even by newspapers like the New York Times and The Herald Tribune. The New York Times calls for active intervention and arbitration by the United Nations which The Herald Tribune fears possible loss of American prestige throughout the east. The paper says: "The entire performance has been one that may increase suspiciousness of those Asiatics who contended that Americans profess to be idealists and usually wind up sup-porting white men against the brown and Conservatives against Liberals."

India, however, has no motive in the Council, as Dr. Pillai's intervention is

recessarily confined to speeches. Something along the lines of the Chinese resolution, it appears likely, will be passed by the Council. It is acceptable to the United States, Brazil, and Columnia. bia, it may also be reluctantly swallowed by Britain, France and Belgium. Soviet opposition, however, may take the form of negative vote or veto in which case another deadlock would be created.
