"The 20 years that have passed have been so full of history, so full of varied changes that it would take volumes to do them full justice. I see it as a long and difficult road, seldom smooth, often beset with pitfalls, over which Mother India has travelled. I see the milestones on this road—there was the Salt Salyagraha Campaign; the Round Table Conference; the Government of India Act, 1935; the establishment of popular Ministries in the Provinces; then the shock of the terrible World War; and the Civil Disobedience Movement of 1942.

"With the advent of peace, there followed the historic declaration of the Prime Minister of the United Kingdom, the arrival of Lord Mountbatten in India, the partition and finally August 1947. I see to day the end of one stage in that journey when the independence pledge of Purna Storag has been finally fuffilled and the Sovereign Democratic Republic of India has at last come into being. We still retain some of our ties with the past; though an independent Republic, we still belong to the Commonwealth and the method by which this has been achieved is, as you have remarked, a tribute to the states manship displayed both in Britain and India. It was stated by someone that the most striking feature of our independence was the way in which it was achieved that the technique of non-violence and peaceful agitation met with its counterpart in the ready response shown by our erst-while opponents; and the peoples of these two great countries were able to part, not merely not as enemies, but as friends without a trace of bitterness on either side.

TASK AHEAD OF UNION GOVT.

"In the last two years, we have done much, although we have undergone great—almost unexampled—calamities; the horrors that followed the partition and the death of the Father of the Nation who had led us into the Promised Land, and who had been our inspiration and our star for so many long decades. We are not yet at the end of our journey and it is. I think, one of the healthiest signs of political life in this country, that while we justly acclaim the achievements of the last few years, the voice of every leader of importance has been raised in a note of caution and warning against the obstacles we have still to overcome. We are a nation of 320 millions, but the vast majority of them live in conditions of the most grinding poverty; the vast majority of them lack the most elementary medical and educational needs. To the vast, majority of them lack the most elementary medical and educational needs. To the vast, majority of them this day can have no meaning, unless it ushers in an era, if not perhaps of prosperity, at least of economic security.

"Fortunately, the manile of the Prophet has fallen on worthy shoulders. Under the leadership of men like Pandit Nenru, Sardar Patel and Dr. Rajendra Prasad, we should have nothing to fear. Their wise statesmanship has already laid down the broad objectives of our goal—to root out the poison of communalism in whatever form, and preserve the unity of India; to root out the canker of corruption, selfishness in public life; to increase by every means our industrial and agricultural wealth; to raise the standard of living of our people and establish social and economic equality; and to foster and develop the popular system of Government.

the benefit of the people, the Chief Minister pointed out as the most outstanding feature, the rights which the new constitution conferred on the citizens. It meant an equal opportunity for all in the governance of the country. Every citizen had a share in the administration and was at once the ruler and the ruled. It was therefore necessary, he said, that overyone should know what it meant to govern and be governed. Under this constitution, every citizen who came of age was entitled to a vote without distinction of castocreed, birth, sex or status, and it extended new privileges and new duties. They should, therefore, learn to participate more and more in the governance of the country, and to respect the land.

Turning to the problems facing the country, the Chief Minister said that these should be soived by the people aione. "Our main problem", he said, "is to produce more food and restore peace in the land." He appealed to the people to extend their wholehearted co-operation for the carly realisation of the development schemes and for bringing to hook all antisocial elements who disturbed peace and retarded production.
